## STEM Apprenticeship Opportunities for College Undergraduates

### College Qualified Leaders (CQL)

A commuter program that takes place in a Department of Defense laboratory. Undergraduate students are matched one on one with scientists and engineers and are provided a firsthand research experience. Selected participants receive a stipend based on education and experience. Summer term or year-round opportunities are available.

### Undergraduate Research Apprenticeship Program (URAP)

A commuter program that provides undergraduate students with an authentic science and engineering research experience. The apprenticeships are held during the summer months at an Army-funded laboratory on a university campus.
