Tips and Tricks!
Here are just a few ways to make your application shine.

➢ Are you a SWENexter?
   We love that you are involved with SWENext but our judges won’t know that unless you put it on your application!

➢ Are you a founding member of any club, organization, or group?
   Congratulations! That is a wonderful feat. Please tell us more about it on your application.

➢ What STEM activities are you involved in?
   Did you organize STEM activities for your community? Are you involved with STEM organizations? Are you in a leadership position? Because SWE is a STEM-based organization, we are excited to hear about everything STEM-related or leadership-related that you do. Make sure you tell us about it all!

➢ Do you have two references?
   One of your references should be a math, science, or engineering teacher. The other reference should be someone who knows you personally and can talk about your interest in engineering and STEM.

➢ Have you updated your resume?
   This is where the judges can see your story all at once. Make sure everything is on your resume and that it matches the information on your application.
